International Perspectives

Fri, 30/06/2006 - 22:00

The Seventh Congress of the League for the Fifth International discussed, amended and adopted these perspectives in July 2006. Every congress of the League, which is attended by delegates from all our sections as well as observers and supporters, attempts to analyse the current global situation, both economically and politically, in order to draw up a set of perspectives, a document detailing how the L5I sees the world developing.

The perspectives help guide our members and supporters in explaining and understanding what is happening under globalisation, the war on terror and the crisis of social democracy.

You can read the perspectives [here](#) [1]

To join the League and help fight for a revolutionary answer to the problems of imperialism and capitalism then please [contact us](#) [2]
