

Website of Workers Power US launched

Tue, 14/07/2009 - 22:58

Workers Power US, a sympathising section of the League for the Fifth International, has launched its first website at <http://workerspower.net/> [1]

Workers Power US is a new organisation which is in political discussions with the League for the Fifth International. Building Workers Power US is an important step forward in the fight for the fifth international and to raise the flag of revolutionary communism in the Americas.

The website will be updated soon with a new action programme for the US as well as more articles and theoretical materials. If you are from the US and want to contact our comrades with a view to joining, entering discussions with them or donating some funds, then please email them at info@workerspower.net [2]

If visitors to this site want to help us with the work of the League then please click on the donate button on the right hand side and consider giving us some money to help fund our international political work.
